INTRODUCTION

ABOUT US

Stablished in 2010, **INDAGRO** is an Egyptian food manufacturing and export company specializing in the production of aseptic tomato paste and table olives.

Our entire production is dedicated to international export markets, serving customers across Kenya, Ethiopia, Morocco, Sudan, Tunisia, Spain, Portugal, Italy, France, Brazil, and other markets.

Quality and food safety are at the heart of our operations. Our facilities operate in accordance with internationally recognized food safety and quality standards, with certifications including BRC, FSSC, Kosher, and Halal.

As part of our continued growth and commitment to providing a broader range of high-quality food products, INDAGRO is also supported by a sister company equipped with state-of-the-art infrastructure and advanced technology for the processing and production of IQF (Individually Quick Frozen) fruits and vegetables, as well as blast-frozen products.

This complementary capability enables our group to offer international buyers a wider portfolio of high-quality, export-oriented food products, supported by modern processing technology, robust quality systems, and a strong commitment to consistency and food safety.

With more than a decade of experience in food processing and international trade, INDAGRO continues to develop long-term partnerships with customers worldwide, focusing on quality, reliability, competitive solutions, and consistent supply.

VISION

To be a role model in Industry and Commerce where our factories become schools of excellence, and our presence grows across Egypt and the world.

PURPOSE

Amplify the Human,
Simplify the Everyday.

VALUES

- Harmony
- Empathy
- Adaptability
- Action Oriented
- Responsibility

INDAGRO FACTORY

OUR PRODUCTS

ASEPTIC TOMATO PASTE

Due to its warm climate and rich soil, Egypt enjoys two main harvesting seasons, a summer one starting from June till August and a winter season starting from December till February.

tomato paste

OUR PRODUCTS

TABLE OLIVES – BULK

Egypt is ranked as one of the top five producers of Table Olives worldwide, producing between 18-20% of global production.

AGRICULTURAL PRACTICES

We apply the latest in the good agricultural practices where traceability till the seedlings is implemented.

PESTICIDE CONTROL

We ensure pesticide residues are within the EU Regulations limit.
